Neemus Assets/Tools/Weapons Tracking and Maintenance System

Why Asset Management ● ● ●

Why exactly do we need an Asset Management System ?

☐ Statutory Requirement

All organization under companies Act are mandated to have their Assets audited and disclose their values on the Balance Sheet in compliance with Accounting Principles and Taxation rules .Considerable time is spent on this exercise every year . Having Asset Management makes it much easier.

☐ Better Purchase Planning

It helps the management team to better plan and optimizes the resources on acquisition of new Assets .

☐ Plugging of leakage

It plugs in the leakage of direct costs such as lost , misplaced , stolen assets , also reduces indirect costs such cost of depreciation .

☐ Better Productivity of Employees

Quick Allocation and deallocation of Assets ensures better productivity of employees.

☐ Tracking of Fuel Efficiency

Fuel Efficiency and meter readings lets you gauge the performance and productivity of any machine and future purchase decisions.

☐ Minimization of spending on assets under warranty

Proper tracking of All Guarantee , Warranty contracts save you from spending on assets which are under contracts.

☐ Planned Maintenance

Scheduled and planned repairs help the machinery to be checked regularly to avoid disruption to production. Also minimizes the break down incidents and elongates the asset life.

☐ Minimization of loss of productivity

Breakdown alerts and quick repair mechanism ensures that downtime and loss of productivity is minimized
